

#HMS

HOTEL MANAGEMENT SYSTEM

(A product of Hash Technologies Pvt Ltd)

*Takes care of all your
back-office needs*

#HMS empowers you to focus on what you always wanted to do – “*hospitality of your visitors*”, instead of doing all the dogged work

#HMS is feature rich, understands your need to improve your front office disposition and acknowledges your desire to add value to your service

#HMS is scalable

Covers all size of hotels and units of hospitality sector. For large hotels and multi-user environment, an RDBMS is required

#HMS is modular

All modules plug-able, can function in isolation and could be integrated whenever required

#HMS is database independent

Runs seamlessly on Access, Oracle, SQLServer, etc.

#HMS has graphic interface

Lots of innovative features built-in. The front-desk personnel can show the room interiors and the window-view to the guest from the front-office workstation itself

#HMS is powerful and fast

Runs on Windows platform. Carefully designed for faster execution of frequently used options

#HMS is for you
