

ERP FOR PRINTING INDUSTRY

The solution covers the entire business process of the Industry such as Production, Inventory, Purchase, Sales & Distribution, Finance and Payroll and generates MIS reports for various levels of management. The software helps in identifying deviations of productivity of each department from their set norms, tracks the manufacturing cost at any stage of production and keeps the top management online with the status of Production, sales, Stocks and Finance.

The special feature of this GUI-based software is that it is customizable to the specific requirement of the end-user, because of its open-ended design and flexible structure. The software runs on all popular databases such as Oracle, SQLSERVER.

The system has six basic modules. This gives client the flexibility to implement the system in a phased manner without sacrificing long-term objectives.

Base Modules

- Production
- Material Management
- Sales And Distribution
- Financial Management
- Fixed Asset
- Personnel Management System
